

# MONO MEGA 106 DECK

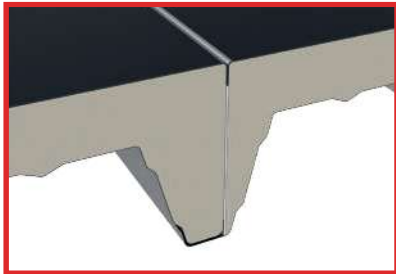

PUR/PIR

MONO MEGA 106 DECK is a self-supporting single-skin roof panel with PUR/PIR insulation and a 106 mm rib profile, featuring a flat backing in bituminous felt. It is designed for low-slope roofs and requires on-site waterproofing with a bituminous membrane.

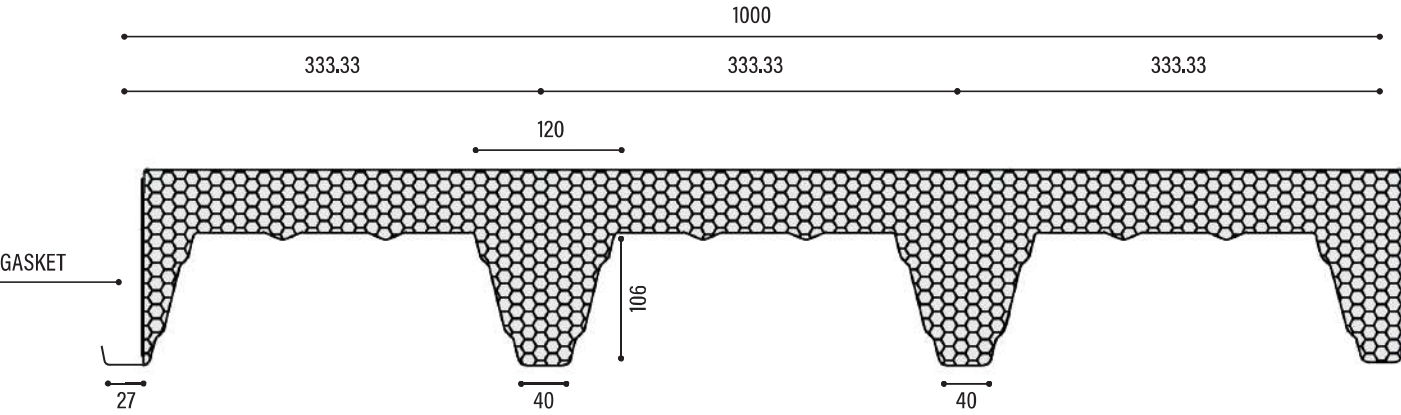

## JOINT DETAIL

| Panel thickness (mm)                                                          | 50    | 60    | 80    | 100   |
|-------------------------------------------------------------------------------|-------|-------|-------|-------|
| Thermal transmittance<br>in accordance with<br>EN 14509 Annex A.10 U (W/m² K) | 0.56  | 0.47  | 0.34  | 0.28  |
| Declared thermal conductivity<br>in accordance with EN 13165 λ (W/mK)         | 0.029 | 0.029 | 0.028 | 0.028 |
