

The Essence of Performance

COMPANY PROFILE

ABOUT US

Building the future, every day

ItalPannelli is an Italian company specialized in the design and production of steel solutions and insulated sandwich panels for civil, industrial, coldstore, controlled environment, and agricultural and livestock construction.

Based in Ancarano (TE), in the heart of Italy, we have been combining industrial precision, technical expertise, and a sustainable vision for over thirty years to deliver high-performance solutions for modern, efficient, and environmentally conscious buildings.

Our facility is the only one in the world with five continuous production lines - an asset that allows us to guarantee flexibility, speed, and operational continuity, even for customized projects regardless of their size.

Each panel is the result of proven processes, low-impact materials, and cutting-edge technologies, with the goal of improving both quality of life and work.

In 2024, we became part of the ArcelorMittal Building Solutions group, a global leader in the steel industry. This strategic alliance has strengthened our international presence and accelerated our technological, productive, and sustainable development.

We build the future one panel at a time - with the identity of a deeply Italian company and a vision that looks far beyond.

OUR VISION AND OUR MISSION

Vision

To become a global reference point for sustainable construction, offering cutting-edge panels and precise, attentive, and dedicated service.

Mission

To shape insulating solutions that combine efficiency and safety by investing in advanced technologies, easily recyclable materials, and increasingly advanced production processes, with the aim of improving the quality of life and work.

OUR BRAND MANIFESTO

The 6 values that guide us

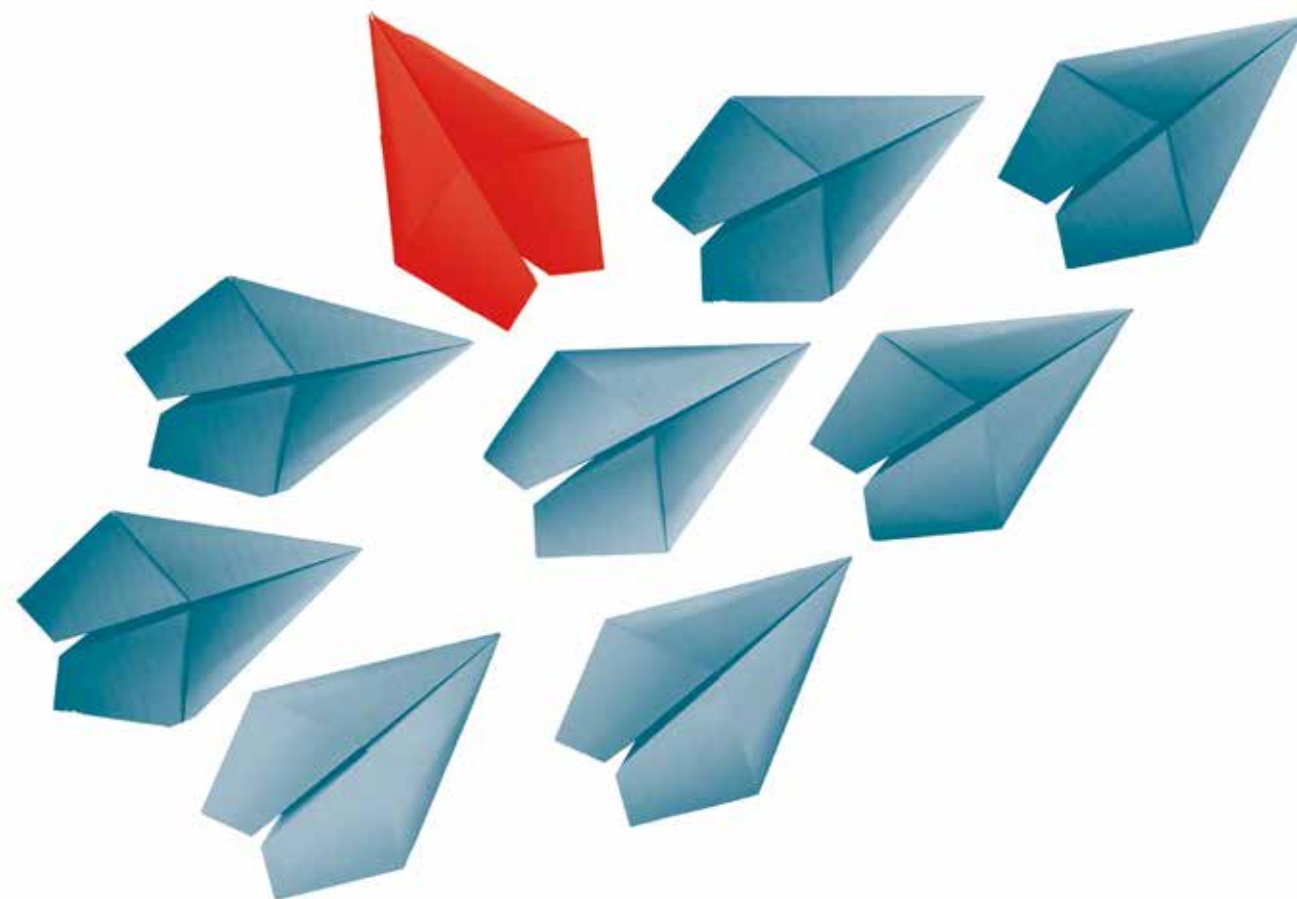

PROUD OF OUR ITALIAN KNOW-HOW

ORGOGLIOSI DEL NOSTRO KNOW-HOW ITALIANO

Ogni pannello che realizziamo porta con sé l'**essenza del Made in Italy**: selezione attenta dei materiali, cura in fase di progettazione e produzione, orientamento alla performance. E soprattutto, autentica passione per il lavoro ben fatto.

RELIABLE BECAUSE UNIQUE

AFFIDABILI PERCHÉ UNICI

Nel mondo dell'edilizia, la fiducia si costruisce sui fatti.

E il nostro stabilimento di Ancarani è l'unico al mondo con 5 linee produttive in continuo. Una garanzia di qualità, efficienza e velocità. Sì, perché per noi la continuità non è solo un processo. È una promessa.

WE LISTEN
WE SOLVE
WE ANTICIPATE

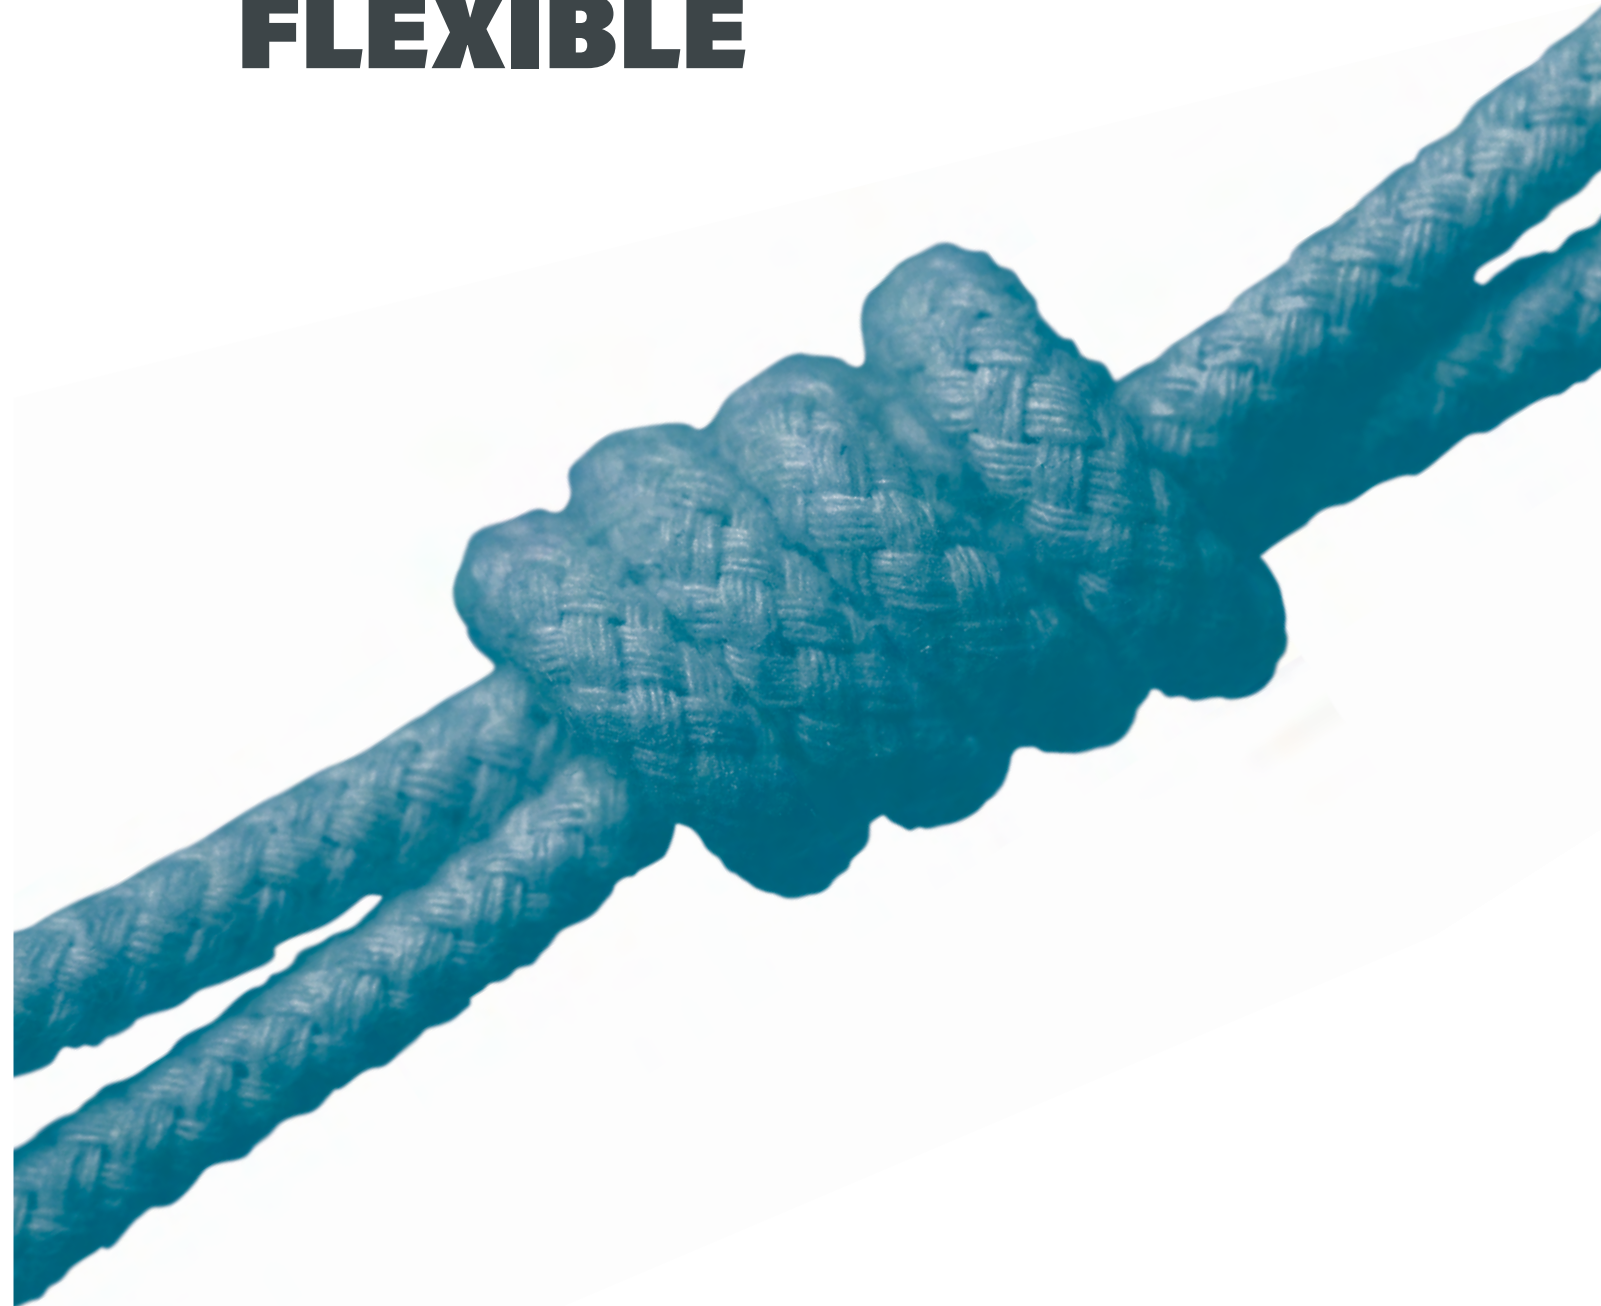

ASCOLTIAMO RISOLVIAMO ANTICIPIAMO

Il servizio per ItalPannelli è un'attitudine.

Dalla prima consulenza alla consegna, ogni richiesta è un impegno, ogni progetto una sfida che affrontiamo con slancio, competenza e audacia. Perché ci piace creare relazioni durature con clienti, fornitori e partner.

STRONG
BUT ABOVE ALL
FLEXIBLE

FORTI MA SOPRATTUTTO FLESSIBILI

In un mondo che cambia, la vera forza risiede nella duttilità.

Per questo intercettiamo l'evoluzione delle esigenze e siamo disponibili a produzioni speciali, anche per piccoli lotti. Perché ogni progetto ha la sua anima, e noi vogliamo interpretarla al meglio.

INNOVATION? SUSTAINABLE!

L'INNOVAZIONE? SOSTENIBILE!

Costruire significa immaginare il futuro.

Noi ci impegniamo per renderlo più sicuro, efficace e sostenibile.

Scegliamo materiali a basse emissioni di CO₂, prodotti con energia rinnovabile, riciclabili e derivati da materiali riciclati.

Investiamo in processi produttivi all'avanguardia e in soluzioni che migliorano la qualità del lavoro e della vita, nel pieno rispetto del Pianeta.

OUR VISION LOOKS FAR AHEAD

IL NOSTRO SGUARDO PUNTA LONTANO

Abbiamo radici solide in Italia, ma lo sguardo è globale.

Dal 2024 siamo parte del gruppo ArcelorMittal Building Solutions, un'opportunità che amplifica il nostro potenziale e ci proietta su nuovi mercati. Perché la vera eccellenza non ha confini!

WHAT MAKES US UNIQUE

Unmatched Industrial Capacity

Our Ancarano (TE) facility is truly unique: it boasts five continuous production lines with a daily output capacity of up to 60,000 m². The site has a total area of 350,000 m², with 80,000 m² covered, also dedicated to the secure storage of materials to maintain their quality while awaiting shipment.

We manage every phase in-house, from design to production and quality control, to ensure maximum efficiency, speed and high standards.

The entire process, including the manufacture of profiles and accessories, is carried out internally at our facility. Our in-house flashings department enables us to offer a complete set of bespoke profiles and accessories, essential for precise assembly that meets the specifications of each project.

A service that listens, solves, anticipates

At ItalPannelli, we believe every project deserves attention, listening, and tailored solutions. That is why we support our clients from the very first stages, offering dedicated technical consultancy and ongoing support.

Our production structure has been designed to offer maximum flexibility: we also manufacture small batches and special processes, maintaining rapid lead times and high quality. Thanks to integrated and efficient logistics, we ensure punctual deliveries throughout Italy and abroad, in some cases within just 48 hours.

Our commercial team is extensively present across Europe, the Middle East, and North Africa, always ready to respond promptly and professionally. We build strong relationships with clients, designers and installers, placing dialogue and ongoing collaboration at the centre.

Flexibility is a core value of our identity: every project requires care and bespoke solutions. That is why we offer a wide range of colours, finishes and customisations, enhancing every idea with the best possible solution.

LOOKING TO THE FUTURE, WITH RESPONSIBILITY

At ItalPannelli, sustainability is an integral part of our identity. Every day we work to reduce the environmental impact of our production processes, focusing on renewable energy, circular economy, and responsible innovation.

Clean energy and self-sufficiency

We have installed a 6.7 MW photovoltaic system at our plant, which generates about 1.7 GWh of energy per year. Almost 23% of this energy is self-consumed, directly powering our production lines and offices.

This allows us to avoid the emission of about 632 tons of CO² each year. In parallel, we adopt energy efficiency solutions such as LED lighting and thermal process optimization to further reduce consumption.

Recycled, recyclable, and sustainable materials

Our panels are designed to ensure durability, efficiency, and reduced environmental impact. For this reason, we use carefully selected materials, favoring those that are recycled and easily recyclable:

Mineral wool insulation:

Over 90% of internal waste is reused or reintroduced into production cycles, minimizing waste.

Recycled steel:

- Electric arc furnace steel: minimum content of 75%
- Alloyed electric arc furnace steel: minimum content of 60%
- Integrated cycle steel: minimum content of 12%

Steel is inherently a sustainable material: it is infinitely recyclable without losing its mechanical properties. Compared to other traditional construction materials, such as concrete or brick, it allows for greater efficiency in production processes and a reduction in emissions, especially if sourced from electric production cycles powered by renewable sources.

Sandwich panels represent an inherently ecological construction solution. Thanks to their layered structure and high insulating power, they help reduce the thermal dispersion of buildings, improving energy efficiency and reducing consumption throughout the building's life cycle. This translates into a lower overall environmental impact and a concrete contribution to more sustainable construction.

Towards a circular future

Our goal is clear: to increase the use of recycled materials, expand production from renewable sources, and continuously improve the efficiency of our processes. Because we believe that sustainable construction is possible, and it starts with us.
