

ITALPANNELLI

The Essence of Performance

ITALDOOR

ITALDOOR

ItalDoor es la línea de paneles ItalPannelli dedicada a los fabricantes de puertas seccionales y basculantes.

Los paneles **STOX**, **KIREX**, **APTOR** y **EIKOR** se producen en una **línea de producción continua y dedicada** desarrollada para garantizar precisión dimensional, uniformidad estética y un rendimiento repetible. Este enfoque industrial permite mantener altos y fiables estándares de calidad, producción tras producción.

STOX es la solución de ItalDoor para aplicaciones comerciales e industriales, desarrollada para entornos operativos de alta intensidad.

KIREX, **APTOR** y **EIKOR** están diseñados para el sector residencial y comparten una **estructura monocasco con sistema antipinzamiento**, una solución compacta y continua que garantiza solidez, estabilidad y protección de la unión, cumpliendo los requisitos de seguridad durante las fases de apertura y cierre de la puerta.

ItalDoor es una línea pensada para apoyar a los fabricantes de puertas en el desarrollo de soluciones fiables, seguras y de alto rendimiento, coherentes con una posición de calidad.
